## FIELD EVALUATION PROGRAM FROM A **RECOGNIZED 3RD PARTY TESTING LABORATORY**

SGS has technical experts that understand your products, the applicable regulations, standards and necessary local requirements. Our full service offering ensures that your products are in compliance with all applicable electrical, technical and mechanical safety standards.

**WHEN YOU NEED TO BE SURE**

# GOT RED TAGGED? WHEN YOU NEED TO BE **SURE** GET SGS.

With a strong portfolio of certifications and accreditations, including being a Nationally Recognized Testing Laboratory (NRTL), SGS is backed by the largest global network of laboratories so we can assist you with both local and global requirements. Our experts ensure that the field labeling process is executed efficiently and effectively resulting in minimal impact to your operation and faster market access for your product.

Our service offerings cover:

- Custom devices in the field, unlisted products onsite, factory relocations and Red Tagged equipment
- Product Evaluation, Labeling and issuing of Certified Reports against UL, NFPA, NEC, ANSI and NEMA Standards
- Products that fall under the scope of Lighting, Display Signs, Audio/Video, Industrial, Medical, IT and Food Equipment
- Same day quoting and engineering services
- Approved by cities, counties and Authorities Having Jurisdiction (AHJ's) nationally such as the City of Las Vegas and the City of Los Angeles as well as Atlantic City, New York City and many others.

As a Nationally Recognized Testing Laboratory SGS also performs Product Listing Certifications and Limited Product Certifications (LPC).
